ZONES

MACRO OVERVIEW

- Global Economic Output
- Wealth Distribution

GREEN ECONOMY

- Climate Change Mitigation
- Green Financing
- Environmental Policy

DIGITAL SOCIETY

- E-Waste Management
- Global Connectivity
- Telecom Infrastructure

INNOVATION

- Human Capital in Tech
- Sustainable Transport
- Intellectual Property
- High-Tech Trade

GLOBAL ECONOMIC OUTPUT

Total GDP by Year

Key Findings: Global GDP has demonstrated resilient, long-term growth over the past three decades, reaching a historic peak of \$109.43 Trillion in 2024 despite periodic economic shocks.

Source:
World Bank

WEALTH DISTRIBUTION

Total GDP by IncomeGroup

Key Findings: Global wealth remains highly concentrated. High-income countries account for 64.5% of total global output, highlighting a persistent economic divide compared to lower-income regions.

World Bank

CLIMATE CHANGE MITIGATION

Total GHG Emissions (MtCO₂e) by Year and Region

Region ● East Asia ... ● Europe ... ● Latin A... ● Middle East ... ● North A...

China

Top Emitting Country

Key Findings: Greenhouse gas (GHG) emissions are heavily driven by industrial growth in the East Asia & Pacific region, with China significantly outpacing other nations as the top global emitter.

Source:
World Bank

GREEN FINANCING

Green Bonds by Country.

United States

France

Key Findings: The transition to a sustainable economy is being actively funded by western markets, with the United States and France leading the world in total Green Bonds issuance.

ENVIRONMENTAL POLICY

FDI vs. Gov Expenditure.

Key Findings:

Foreign Direct Investment (FDI) vastly outpaces direct government environmental expenditure in major economies, indicating that private capital is the primary driver of green infrastructure growth.

Source: IMF

E-WASTE MANAGEMENT

Total E-Waste in kilograms per capita

246.05

Total E-Waste

Key Findings: The rapid expansion of digital infrastructure carries a severe environmental cost, with global electronic waste reaching an alarming average of 246 kg per capita.

Source:
Eurostat

GLOBAL CONNECTIVITY

Mobile Subscriptions by Country

7.85bn

Total Mobile Subs

Key Findings:

Global mobile connectivity has reached near-universal penetration with 7.85 billion subscriptions, overwhelmingly driven by massive consumer bases in China and India.

Source: ITU

TELECOM INFRASTRUCTURE

Most Efficient Regions on Investments

330.21bn

Total Telecom Inv...

Key Findings:

East Asia & Pacific leads in total telecom investments, while South Asia demonstrates exceptional investment efficiency, achieving massive subscription numbers with significantly lower capital input.

Source: ITU

💡 HUMAN CAPITAL IN TECH

ICT Specialists (%) Trend

Key Findings: The global workforce is rapidly adapting to digitalization, reflected by a steady upward trend in the number of ICT specialists globally over the last decade.

Source:
Eurostat

SUSTAINABLE TRANSPORT

EV Charging Capacity by Country

Key Findings: European nations are pioneering the shift towards sustainable mobility, with France, Germany, and Italy leading the development of Electric Vehicle (EV) charging infrastructure.

Source:
Eurostat

INTELLECTUAL PROPERTY

19M

Total Patents

Top Countries by High Tech Exports

Exports and Patent Trend

Key Findings: Data reveals a strong positive correlation between intellectual property generation (19M total patents) and economic value, where R&D directly fuels high-tech export growth.

Source:
World Bank

HIGH-TECH TRADE

World High Tech Exports

31.75T

Total High-Tech Exports

Key Findings: The global high-tech trade market is highly centralized, with Asian economic powerhouses (China, Hong Kong) and Germany dominating global export volumes.
